

JAVA DEVELOPER TECHNICAL EXAM

Create the ff REST APIs using Spring Boot App (Java 8) and PostgreSQL as your database.

Timeline: 5 days

Once done push it on a git repository (bitbucket/github) and give access to the ff emails:

apasno@fshc.ph

rsantos@fshc.ph

lpecson@fshc.ph

1. **Description:** CRUD for IDs

POST * <http://localhost:8080/fs-test/identification/add>

POST * <http://localhost:8080/fs-test/identification/delete>

POST * <http://localhost:8080/fs-test/identification/update>

GET * <http://localhost:8080/fs-test/identification/list>

sample

response:

```
[
{
    id: 1,
    name: driver's license
},
{
    id: 2,
    name: nbi clearance
}
]
```

2. **Description:** Facebook Login API integration

(<https://developers.facebook.com/docs/facebooklogin/manually-build-a-login-flow>)

POST: <http://localhost:8080/fs-test/fb-signup>

POST: <http://localhost:8080/fs-test/fb-login>

NOTE: you will be graded based on the ff:

1. code readability and cleanliness/neatness.
2. logic/implementation
3. timeliness of delivery.
